

# IS YOUR WAITING ROOM OUTDATED?

-**Monica Socks** monica@beachleymedical.com; 800-947-3595 Beachley Medical Office Solutions

Walk in to your waiting room as if you were a patient. How does it make you feel? Would you trust that your physician has it “all together”? Is there adequate seating to provide for families and bariatric patients? Or, would you think “gee, if they can’t put much effort into making my visit pleasant how much effort will they put in to my healthcare?”

**Believe it or not, more patients are judging your office by the presentation of your waiting area than you realize.**

It doesn’t have to cost a lot to freshen your look and make your patients feel like they are being treated by professionals.

Here’s how we can help:

On site personalized consultation

We can help with other option – send the Furniture team a message and ask if it’s possible to get an item “transfer” from one of the other facilities for you to order from and how much that would run you.

It looks like they are in stock in Boston and Nashville which shouldn’t be too hard to get them up here to us.
